

Climbing Saddles

Positioning Saddles are Sized for Optimum Comfort and Fit

Choosing a Saddle Style

Selecting the correct positioning saddle size is very important for optimum comfort and confidence in the saddle. It is also important to know what style of saddle you prefer. We offer Butt Strap vs. Leg Strap, Floating vs. Stationary Dee Rings, Single vs. Double Dees, and leather vs. cloth construction are some of the options to consider. Our sales staff can help you choose the style that best fits your needs and budget.

Choosing the Best Fit

The following sizing applies to all our saddles and uses a Dee to Dee Measurement (Point A to Point E) to help determine the correct and best fitting saddle size by ensuring the dees are properly located in front of the hipbones. With front location the user has better positioning ability and added comfort. This sizing also takes into account the Minimum Length Measurement (Point B), Maximum Length Measurement (Point D) and Center Measurement (Point C) so achieving the perfect fit is easy.

Dee to Dee Measurement - This measurement is the most important. It is the measurement from side dee to side dee on the waist belt of the saddle. Step 1 below explains how to obtain this measurement. (Point A to Point E)

Minimum Length Measurement - This is the length when the waist belt is buckled in the last hole. It is the smallest waist size the saddle will fit. (Point B)

Maximum Length Measurement - This is the length when the waist belt is buckled in the first hole. It is the largest waist size the saddle will fit. (Point D)

Center Measurement - This is the length when the waist belt is buckles in the fourth hole. If the saddle fits the user buckled in the fourth hole, there is enough room for adjustment to accommodate both summer and winter clothing. (Point C)

Getting the Perfect Fit

*Drop down approximately 4" from the top of each hipbone and measure the distance around the back from hipbone to

hipbone using a tape measure. Add 2" to this measurement. This is the Dee to Dee Measurement. Please note: the added 2" will bring the dees in front of the hipbones for better positioning. (See figure 1)

*Find the user's Dee to Dee Measurement in the chart below. The user's correct positioning saddle size is listed to the left of the proper Dee to Dee Measurement.

*The user's Waist Measurement should fall between the Minimum and Maximum Length Measurements for that size. Remember to allow some room for adjustment for use with summer and winter clothing.

*If user's Waist Measurement is larger than the Maximum Length for that size, we recommend the user go up to the next size to accommodate the Waist Measurement. If user's Waist Measurement is smaller than the Minimum Length for that size, we recommend the user go down a size. Please keep in mind that going down a size may place the dees further back which may not be as comfortable as when the dees are in front of the hipbones.

Size	Dee to Dee Measurement	Minimum Length Measurement	Max. Length Measurement	Center Measurement
XSmall	18"	31"	39"	35"
Small	20"	34"	42"	38"
Medium	22"	37"	45"	41"
Large	24"	40"	48"	44"
XLarge	26"	42"	50"	46"

Butt Strap Saddles

Four Dees Extra Cotton

Four dees provide greater positioning ability and stability. Cotton webbing reinforced with nylon makes these belts comfortable and strong. Two nylon utility straps (one with nickel plated snap and one with nickel plated 2" ring) help keep tools handy. Saddle 08-01010 has 1" neoprene leg straps to help keep saddle in position and help reduce slip through.

Price: \$113.00
Order #: 08-01015

Butt Strap, 4-Dee, Cotton

Butt Strap, One Floating Dee Double Thick Cotton

A double layer of cotton webbing provides the extra comfort and back support in this quality saddle. Plus you get the added maneuverability that a floating dee provides. Leg straps of 2" wide nylon lined with soft brown oil tanned top grain steer hide leather are more comfortable than narrower unlined straps. Four 1" nylon utility straps (two with nickel plated snaps and two with 2" nickel plated rings) allow convenient attachment of tools and equipment to your saddle.

Price: \$114.00
Order #: 08-01045

Butt Strap, One Floating Dee Ring, Wide Back

Offers extra back support. This saddle offers extra back support and more freedom of movement. The extra wide 6" waist back is foam filled and lined with soft brown oil tanned top grain steer hide leather to provide back support and comfort. Four nylon utility straps (two with nickel plated snaps and two with nickel plated 2" rings) keep tools handy. Leg straps of 2" wide nylon lined with soft brown oil tanned top grain steer hide leather are more comfortable than narrower, unlined straps. Leg straps help reduce slip-through. Also available in a 2-Dee style.

Price: \$135.00
Order #: 08-01040

Butt Strap, 4-Dee, Wide Back, Cloth

Price: 243.50
Order #: 41-1391
S, M, L, XL

Pinnacle Saddle

The Pinnacle Saddle is similar to a traditional-style saddle with added comfort and features. The batten seat provides ultimate comfort while suspending from an overhead line. A firm back pad provides superior back support while working aloft. The waist strap is available with a friction or tongue buckle.

Butt Strap, One Floating Dee, Wide Back

Deluxe Modular Model 1345 Saddle

Similar to Model 1340. This model differs only in that we use a butt strap for the seat section, for those climbers who prefer a more traditional type saddle. 1 1/4 inch nylon leg straps help keep the saddle in place and reduce the possibility of slip through.

S, M, L, XL

Leg Strap, One Floating Dee, Wide Back

Leg Strap, Model 1340 Saddle
Floating dee ring saddle with individual padded leg straps. Extra thick padding in the back support and leg straps provides comfort. The floating dee ring offers the user superior freedom of movement when in the tree. Also available with two floating dee rings.

Complete Saddle Price: \$275.00 Order #: 41-1340 S, M, L, XL	Bottom Assembly Only Price: \$135.00 Order #: 41-1342B0
---	---

Leg Strap, One Floating Dee, Wide Back

Model 1349 Leg Strap, Floating Dee Saddle
A lightweight version of our popular Model 1340 as shown above. An 8" wide rigid back pad provides plenty of support. The combination of padded individual leg straps and a floating dee ring offers the climber superior freedom of movement.

Price: \$170.00
Order #: 41-1349
S, M, X, XL

Leg Strap, Two Floating Dees, Wide Back

Leg Strap, Two Floating Dee Extra Wide Back Saddle
One of our most comfortable saddle options, this saddle easily maneuvers. This saddle provides easy maneuverability and back support, and is designed specifically for split-tail climbing. Features an extra wide 6" waist back. The waist back is foam filled and lined with soft brown oil tanned top grain steer hide leather to increase back support and comfort. Four nylon utility straps (two with nickel plated snaps and two with nickel plated 2" rings) help keep tools close at hand. Features 2" nylon leg straps with slip-on pads that provide extra comfort. Also available in a one dee style.

Leg Strap, Stationary Dee Saddles

Leg Strap, Stationary Dee, Cloth

Navajo V2 BOD
The Navajo V2 BOD is constructed to the same demanding standards as other Petzl products. It provides a comfortable fit while offering the technical requirements for the rescuer or rigger. In addition to lateral D-rings for work positioning and a rappelling D-ring, the sternal D-ring allows the user to hang in a more vertical position for vertical work. Petzl's Double Back buckles make it easier, faster and safer to put on the harness.

Price: \$250.00
Order #: C 67

Leg Strap, Stationary Dee, Cloth

Traverse Saddle
Four dees provide greater positioning. The Traverse Saddle is similar to the Pinnacle, but utilized two sliding dee rings for overhead suspension, offering the user superior lateral movement. We now use a 6 ply neoprene impregnated nylon suspension strap for added wear resistance. The two sliding dee rings, adjustable center of balance, and batten seat make the Traverse a favorite among tree workers.

Price: 255.00
Order #: 41-1392
S, M, L, XL

Leg Strap, Stationary Dee, Cloth

Navajo Vario Saddle
Particularly comfortable thanks to the wide, padded belt and leg loops, the Navajo Vario has attachment points at the front and sides for work positioning. A rear ring is designed to fix shoulder straps.

Price: \$165.00
Order #: C 79

Saddle Suspenders Retrofit

Fits any Buckingham saddle. Proves extra support and comfort.

Price: \$39.95
Order #: U6261

Saddle Accessory

Price: \$31.00
Order #: 08-01020

Extra Wide Back Saddle Conversion Pad
Add to your regular saddle for extra back support and comfort. Foamsaddle seating (1/4" thick) is layered between black rubberized belting material and a soft brown oil tanned top grain steer hide leather liner. Put this 6" wide belt inside your regular saddle's waist belt (making sure to leave clearance for grommets and the waist belt buckle) and fasten the three Velcro® loops around the back of the belt for greater back comfort. With the Velcro® loops there is no need for a strap around the front of your waist. Available in Extra Small (23" long), Small (26" long), Medium (30" long) or Large/Extra Large (33" long) to fit Weaver Leather and other positioning saddles.
